

1 PASSAGE, SIZES FROM 1/4" TO 3/4"

The unions of model C are used in applications with high pressure and high rotation speed. A special double row bearing and the balanced sealing allow to operate at high pressure without any problem. Model D (heavy duty) seals in tungsten carbide to tungsten carbide, are microlapped for low friction. All the parts in contact with the fluid, made in stainless steel, allow to use the unions with many different fluids including water.
