Rev. 19-0923 Page 1 of 1 Uncontrolled Document

The next stage up is the KENOVA Setline V466 with its greater measuring range: 600 mm diameter and 600 mm in length. The Setline V466 shines out among the competition thanks to its modern and ergonomic design as well as to some adjustment related to current market demands. The SK50 precision spindle with vacuum and spindle clamping, mounted on an anti-friction bearing, lays the foundation for precise measurements.
