

Design

Permissible concentricity deviation of hollow taper shank to location hole $d = 0.003$ mm (measured at $3 \times D$ cantilever length). Chucks are fine balanced according to ISO 1940-1 G 2.5 at 25,000 rpm. The clamping diameter is designed for a shank tolerance of h6.

Standard Specification

Adjusting screw for length adjustments is not included.

Note

Other designs and sizes are available on request.
